Southern Circuit Day 1
March 8, 2003
By Amy Smith Linton

Savannah is great. Really. It makes people funnier, for one thing. After a day on the tricky waters of the Skidaway and Wilmington Rivers, people start coming up with great sayings, like, "Sometimes a puff will shoot you right to the back of the fleet." or "You can go from the front, make a mistake, and end up at the back - except you didn't make a mistake."

Anyway, Savannah is great. The race committee makes a real effort to run fair races - even given that you can't see the windward mark from the start. This is a regatta where experience and miles pay out. Just look at the results: Dave Peck is a younger fellow, but Dick Hallagan and Jim Carson are showing the fleet how to work the course.

It's a moderate, if chilly, weekend, winds are 3-10 at any given moment, boats to windward and leeward can be surfing past while you wait, in the calm. This regatta is a test of patience, a test of exotic bug spray, a test of how well you can carry a spinnaker to weather. It's also a test of how much good food you can eat, and how late you can stay up talking to old friends and new ones. You're missing it - hope to see you next year.

Deep South Savannah
Southern Circuit Day 2
March 9, 2003
By Thomas Allen

After waiting we tried for a race around 12:30. After everybody went out to the start area and sailed around for a while the wind died again so the race was called off.
