|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

### Registry of Lightning Owners

(Corrected to January 1, 1959)

You will note that the address of the owner is omitted. This you will find under the alphabetical listing. Fleet affiliation is denoted by the figure in parenthesis following the owner's name. If the name is followed by (U), this signifies the owner is unaffiliated.

Where boat number is followed by an asterisk (\*), it means that there is an approved measurement certificate on file for this boat.

All boats not so marked do not have measurement certificates on file.

#### THE LOST COLUMN

Following are our missing boats. These boats have either been sold to unknown owners or mail sent to our listed owners has been returned to us and the owners lost as a result. We have listed below the number of the boat

and the last known owner. If anyone has any information on any of these boats or their present owners, we would greatly appreciate it if you would write the LCA office with this information.

# A Note of Appreciation

To each of our Advertisers, who have so graciously cooperated in making this Year Book a success, we can only say — "Thank You" — we wish to assure you that your Ad will create many new customers among our association.

To the Fleets, Clubs and Districts who have also cooperated — you know how much this is appreciated.

To each and every one we again say . . . Many Thanks.

The Staff

# Was 1956 the FIRST YEAR of the SPHERICAL SPINNAKER?

# Positively No!

# The ROLLER CHUTE BEGAN in 1954

Year 1954—The ROLLER Wider Spinnaker first took shape in the mind of Walter Roller, an avid Lightning Class Skipper and Commodore in this area for the Lightning Association. Before the middle of that year, it was rolling off the board to the

Sailmaker - Lincoln H. Foster at Oshkosh, Wisconsin. Through the combined efforts of these two gentlemen, the ROLLER chute was ready to roll in early 1955. With the desired design and the excellent craftsmanship of Lincoln Foster, the most unusual chute came into being—ONE THAT WAS TRULY REVOLUTIONARY. So much so, that it caused others to take notice of the true flow of a spinnaker.

By September, 1955, we were receiving letters reporting on the efficiency and starting performance of the ROLLER. In the Michigan Lightning District Championship, one skipper who had to restart, passed 14 boats on the free leg of the first round and won the race on the second round—using his ROLLER.

#### Startling! YOU BET and that was 1955!

1956-1957-1958 have shown equally as startling results. Even used on Lightnings down in South America; on 5.5 meters in Switzerland, France and other European countries.

ROLLERS are shaped spherically in the proper proportions to suit the type of boat whether deep keep or scow.

YOU HAVEN'T TRIED A REAL SCIENTIFICALLY DESIGNED CHUTE
